Dear [First_Name],

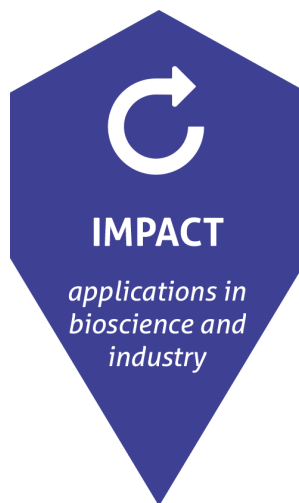

Join us on **March 26-29, 2017** for the 33rd International Symposium on Microscale Separations and Bioanalysis (MSB 2017) at the intimate [Conference Center Leeuwenhorst](#) in the blooming-tulip area nearby Amsterdam International Airport and the North Sea.

MSB 2017 embodies an interactive forum for the discussion of cutting-edge research on the frontiers of separation science, spanning fundamental theory/method/technology development to high-impact applications relevant to health, medicine, food and the environment.

MSB 2017 centers on science and people by creating a confidential ambience that ensures vigorous exchange between delegates. The attractive conference format features:

- A program built for over 70% from submitted abstracts;
- A double-blind peer review process ensuring top science regardless reputation and seniority;
- Oral presentations with 1/3 of the time reserved for active discussion;
- Topic sessions introduced and chaired by leading researchers;
- A one-day track (Bio)Pharma-meets-Microscale-Separation-Science;
- A young-investigator session with rising stars in microscale separations;
- Poster sessions with selected 3-minute talks;
- Science Café lunch seminars by vendors presenting advances in commercial separation technology;
- Registration including lunches, opening&closing receptions and symposium dinner;
- A scenic venue in 'the largest flower garden of Europe' near coastal dunes;

MSB 2017 will feature stimulating pre-conference workshops, distinguished plenary speakers and a parallel program of diverse topics with presentations along three main themes in Microscale Separations and Bioanalysis:
